

Hu-Friedy is pleased to announce a new partnership and composite instrument collection:

## COMPOSCULP BY DR. DIETSCHI

### FACT

Aesthetic composite restorations can be consistently achieved provided a clinician performs with a complimentary set composite instruments.

### CHALLENGE

Restorative outcomes depend heavily upon instruments that allow a clinician to access difficult-to-reach areas and place composite materials accurately and aesthetically.

### SOLUTION

Hu-Friedy offers reliable, high quality composite instruments that save time during chairside procedures, resulting in accurate and excellent restorations and patient satisfaction.

### POINTS OF PERFORMANCE

- **Accurate Restorations:** Highly polished stainless steel working ends resist sticking to composite materials.
- **Durable and Lasting:** Working ends made with Immunity Steel®, an optimal blend of carbon and chromium providing strength and resisting corrosion.
- **Reduced Pinch Force:** The ResinEight® handle's special knurled texture increases rotational control, providing a lightweight, tactile grip.
- **Easy Cleaning:** The Smooth handle's sleek design aids in preventing the build up of composite material.
- **Ordering Convenience:** Instruments can be ordered as an entire collection of 5 or individually.
