

A SHARPER EDGE FOR BETTER CARE

| EverEdge® Technology

How the best perform

EVEREDGE® TECHNOLOGY

Hu-Friedy's EverEdge Technology is unlike anything you've experienced before in a scaler. We've combined state-of-the-art technology in metallurgy, heat treatment and cryogenics to create a superior stainless steel that keeps your scalers and curettes sharper longer. That means less frequent sharpening, less hand fatigue, and greater comfort throughout the day.

“As an educator, I always recommend Hu-Friedy's EverEdge instruments to my dental hygiene students. When well maintained, they can be sharpened so quickly and easily. A real advantage of the fine sharp cutting edge is **less hand fatigue for the hygienist and better comfort for the patient**, so both the clinician and patient can feel the benefits of EverEdge.”

— Jill Nield Gehrig, RDH, MA
Dean Emeritus, Division of Allied Health

STAYS SHARPER LONGER

The revolutionary stainless steel alloy is super-durable and stays sharper longer so the clinician can spend less time sharpening.

PROPRIETARY PROCESS

Our proprietary processing ensures that the superior edge retention and wear characteristics of EverEdge Technology will last the entire life of the instrument since it's not a superficial coating, so they can be resharpended like any other scaler.

DIAMOND KNURL

The unique diamond knurl pattern on the large diameter handle provides a confident and comfortable grasp. The #9 EverEdge handle was also designed to be the optimal weight for reduced hand fatigue.

COMFORT ZONE CONE WITH SIGNATURE SERIES GRIP

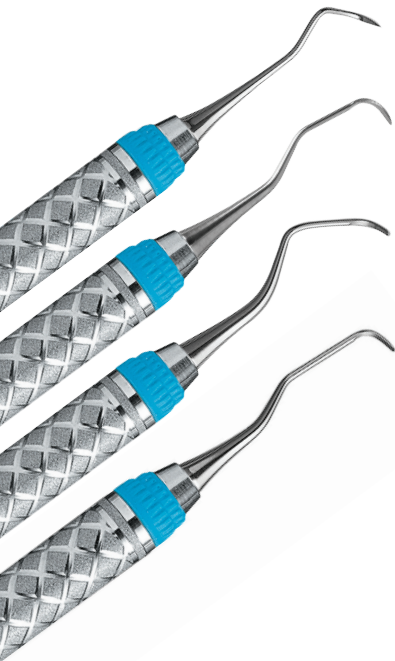

The cushioned grip provides a smooth transition and increased comfort. With distinctive Ocean Blue grips, EverEdge scalers can be easily identified in a set up.

FINELY-HONED FINISH

EverEdge Scalers feature a hand-crafted finish from Hu-Friedy's professional artisans that keeps edges effectively sharp and allows for efficient scaling.

NOW AVAILABLE IN RESIN 8 COLORS

These lightweight resin handles use a color-coded system to easily identify scalers and curettes that correspond to anatomical areas of the mouth.
