How the best perform

CORPORATE EDITORIAL

Since 1908, Hu-Friedy has been putting the highest quality and most innovative dental products in the hands of dental professionals worldwide. And today as one of the world's leading dental instrument and product companies we continue our commitment to advance dental performance by supporting these products with world class service, education and peer communities.

We're committed to making sure the best perform that way.

A WORLDWIDE FOCUS ON QUALITY

Hu-Friedy is based in Chicago and has been privately owned by the Saslow family since 1958.

Today we employ over **700 talented and committed employees** with a sales force covering **more than 25 countries** – including **international offices and distribution centers in Milan, Frankfurt, Shanghai, Tokyo and Tuttlingen.**

CUTTING-EDGE CLINICAL SOLUTIONS

CHECK OUT WHAT'S NEW
IN HU-FRIEDY FAMILY!

For more than one hundred years, Hu-Friedy has led the dental industry through **technological innovation**.

We consistently collaborate with **research centers, universities, and key opinion leaders** to understand the emerging needs of practitioners, to stay at the forefront of the latest dental technologies and methodologies, and to develop new and ever-better products

NEW EVEREDGE® 2.0 THE MOST ADVANCED SCALER EVER

WHY EVEREDGE® 2.0

What will the newest, most advanced, sharpest and longest-lasting scaler on the market do for you?

Help you perform better than ever...

STAYS SHARPER EVEN LONGER

EverEdge 2.0 uses a new, optimized heat control process in order to maintain the hard, sharp edge. This heat control, plus several manufacturing intricacies in Hu-Friedy's proprietary process, provide the durability needed for effective procedures and continued use.

UNCOATED PERFORMANCE

Similar to the original EverEdge technology, our proprietary processing ensures that the superior edge retention & wear characteristics of EverEdge 2.0 will last the entire life of the instrument. Since it's not a superficial coating, these characteristics can't be sharpened or scraped away. EverEdge 2.0 scalers can be resharpended at any point to extend their life.

REVOLUTIONARY TESTING SYSTEM

Hu-Friedy has invested in a custom blade evaluation system to ensure clinicians are receiving the sharpest possible instruments. Blades from every batch of EverEdge 2.0 are tested right off the factory line to confirm that the sharpness value remains in our target range, averaging 5 newtons of force required to cut the test material.

NEW FINELY-HONED FINISH

EverEdge scalers are sharp...EverEdge 2.0 scalers are even sharper. Using an enhanced finishing process, Hu-Friedy's professional artisans are creating edges that are scientifically measured to be over 60% sharper than the next closest competitor. Less force means easier, more comfortable scaling for the clinician and patient.

DIAMOND KNURL METAL HANDLE

The same EverEdge handle you love! The unique diamond knurl pattern on the large diameter handle provides a confident and comfortable grasp. The #9 EverEdge handle was also designed to be the optimal weight for reduced hand fatigue.

NEW EVEREDGE® 2.0

THE MOST ADVANCED SCALER EVER

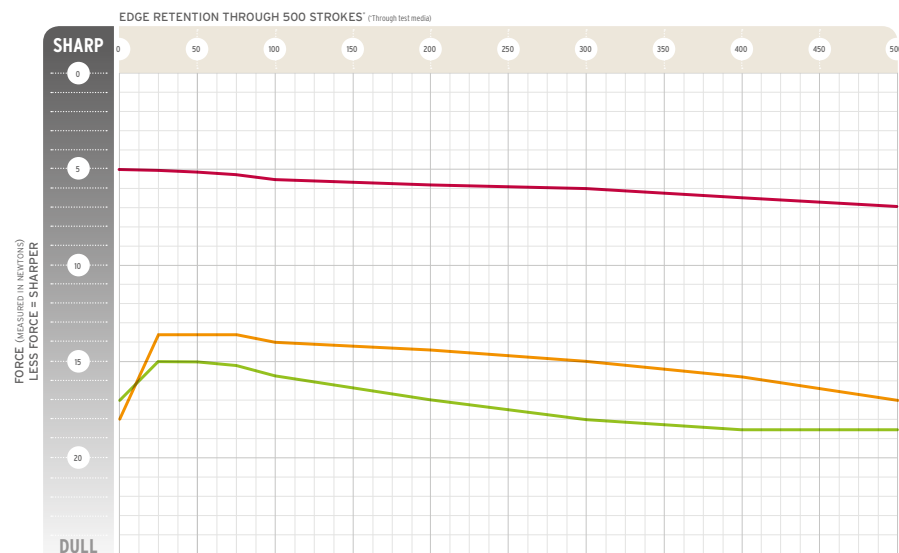

EVEREDGE 2.0 is **72% sharper** out of the box than the next closest competitor

And after **500** strokes it's...

63% Sharper than American Eagle

56% Sharper than LM-Dental

HOW EVEREDGE® 2.0 TECHNOLOGY COMPARES AGAINST COMPETITORS

EverEdge® 2.0 LM-Dental American Eagle

WHY DO SOME INSTRUMENTS GET SHARPER AFTER SEVERAL USES?

When there is a spike in sharpness, that is due to the burr formation on the product. A burr is a small flap of metal that actually covers the instrument's blade. Burr formations occur when the finishing step is done too quickly – an indication of poor process control. EverEdge 2.0 scalers do not have a burr formation due to our refined process and techniques.

WHO TESTED THE INSTRUMENTS?

Independent testing was conducted by CATRA, a specialized blade laboratory. They evaluated Hu-Friedy EverEdge scalers alongside four competitors' instruments.

HOW WERE THE INSTRUMENTS TESTED?

The blade of each instrument was tested by repeatedly pushing it into a specially calibrated silicone test strip. The amount of force required to push the blade into the test media was measured in Newtons, a common international unit used to measure tension and shear force. The less force required to penetrate the media indicates a sharper blade.

The blades of each instrument were also subjected to multiple strokes on the same calibrated test strip to simulate wear. These repeated strokes will begin to reduce the sharpness of the blade and therefore require more force to enter the test strip. After a predetermined amount of strokes is applied, the force to make the final cut is measured to determine the sharpness durability of the blade.

NEW BLACK LINE SWISS PERIO INSTRUMENTS

PERIOSTEALS

**KOL
CORNER**

Instruments made in collaboration with **Dott. Rino Burkhardt**, Opinion Leader Hu-Friedy

FEATURES AND BENEFITS

SPECIFIC DESIGNED INSTRUMENTS

- Less tissue trauma by refined working ends;
- Ultimate manufacturing tolerances for precise handling;
- Easy to clean.

BLACK LINE EXTENSION

- More contrast between the instrument and the tissue;
- Avoid light reflection;
- More sharpened than standard.

BALANCED WEIGHT

- More control and precision in specific and delicate microsurgery procedures.

NEW GOLDSTEIN MICRO PLACEMENT INSTRUMENT

Goldstein Micro Placement Instrument
TNGMPI

Retail	Promotion
42,81 €	32,50 €

The Goldstein Micro Placement Instrument was designed for clinicians who practice minimally invasive dentistry. The philosophy demands carious or defective pits and fissures be prepared with minimal enamel reduction. The small size of the placement instrument increases visibility and maneuverability when applying tints, opaquers, base or liner materials.

FEATURES:

- XTS® (Aluminum Titanium Nitride) Technology provides a dark, extremely hard, smooth surface which sticks less to restorative materials while minimizing light reflection
- The 90° and 110° working end angulation is ideal for working in small, tight spaces throughout minimally invasive procedures.
- The exceptionally fine tip is necessary when performing minimally invasive restorations.

THE MICRO PLACEMENT INSTRUMENT (TNGMPI) IS EXCELLENT WHEN...

Applying liners or base materials in small pits or fissures.

Inserting material in Class V restorations to cover deep "V" shape without accidentally brushing this material against remaining dentin or enamel.

Placing small amounts of material over pulp exposure or deep areas close to the pulp.

Applying small amounts of base material in deep areas of Class II restorations.

Placing liner/base material along pulpal wall during Class III restorations.

Repairing small defects of porosity in composite resin, temporary restorations or even ceramic defects with a flowable composite.

INSTRUMENT MANAGEMENT SYSTEM AND INFECTION PREVENTION

CHOOSE TO WORK SMARTER, NOT HARDER

Hu-Friedy's **Instrument Management System** is the most comprehensive, reliable, and complete instrument processing and infection control system on the market today. IMS combines **sterilisation, storage and organization** of instruments in one **integrated system**.

Hu-Friedy's IMS system allows you to focus on your patients rather than wasting valuable time looking for the instruments to complete a procedure.

SPORECLEAR® DISINFECTANT FOR NON-INVASIVE MEDICAL DEVICES

This one-step formula cleans and disinfects critical workspaces within 1 minute of contact. It offers a fast, simple and effective answer to creating a safe work environment protecting dental staff and their patients from harmful pathogens. Sporeclear is nonalcohol based, free of aldehydes, chlorine, phenols, peroxide and nonylphenol ethoxylates, (NPEs), making them compatible with all washable surfaces and eco-friendly. At Hu-Friedy, we create innovative solutions to help dental professionals perform at their best.

Scissors (TC or SC), Rework and refurbishment	SHSCISTC
Dressing pliers, Rework and refurbishment	DPGEN
Tissue Pliers (Micro or TC), Rework and refurbishment	TPMICRO

EXTENDING YOUR INSTRUMENTS LIFE!

SHARPENING

Instruments should be kept sharp and true to their original design. Dental procedures are most effective when using sharp instruments because they reduce fatigue, improve deposit removal, save time, enhance tactile sensitivity, and minimize patient discomfort.

PREPARATION

Our experienced service team in Tuttlingen checks, repairs and upgrades your Hu-Friedy Instruments.

MAINTENANCE

Regular maintenance extends your instruments life, improves reliability and ensures highest comfort and safety for patient and user.

CUSTOMIZATION

You can choose to customize your instrument, engraving the name of your office, its logo, or more simply, by procedural kit, making them easily identifiable for you and your team. Our laser marking technology allows our Technical Care Center Team to offer this.
