Introducing...

HuFriedyGroup

The Best In Practice

Who We Are

We are a combination of companies that have come together under one roof to deliver the products, services, and solutions you need to be the best in practice. With our passion for infection prevention solutions, premium instrumentation, and service and support programs, HuFriedyGroup will help you perfect your craft and continue to deliver the highest level of care to each patient.

What Can You Expect From HuFriedyGroup?

HuFriedyGroup is here to provide the best dental experience to the industry. Our unique combination of products, services, and support enable dental professionals like you to reduce risk, improve efficiencies, drive compliance, and enhance patient and staff safety.

World-Class Products

Our unwavering passion and unrivaled expertise in the dental industry is evident in the instruments and infection prevention products you trust each and every day.

Compliance & Protection

We provide solutions that help you to ensure a safe environment for patients and staff.

Service & Support

Through our community platforms, customer service and educational programs, we provide you with the information and tools you need to perfect your craft.

Proud members of HuFriedyGroup:

EVEREDGE™ 2.0 INSTRUMENTS SCALERS AND CURETTES

SCALERS EVEREDGE™ WERE SHARP..

SCALERS EVEREDGE™ 2.0 ARE EVEN
MORE SHARPENED.

Using an enhanced finishing process, Hu-Friedy's professional artisans are creating edges that are scientifically measured to be over 60% sharper than the next closest competitor. Less force means easier, more comfortable scaling for the clinician and patient.

*Products tested: Hu-Friedy EverEdge™ 2.0 H7, American Eagle XP H6-7, PDT H6-7, LM EM/EN H6-7, and G M Hartzell H6-7. Hu-Friedy cooperated with CATRA, an independent specialized blade laboratory, to conduct this testing. For more information, contact David Platt, Hu-Friedy Mfg. Co., LLC, 3232 N. Rockwell St, Chicago, IL 60618.

RESTORATIVE INSTRUMENTS HU-FRIEDY®

AKRO-FLEX™ COMPOSITE INSTRUMENT

CREATE BEAUTIFUL RESTORATIONS

Akro-Flex™ Composite Instrument is extremely flexible which allows clinicians to effortlessly manipulate composite materials during aesthetic restorations.

The inclusion of a ductile material allows Akro-Flex™ Composite Instrument to perform as a solid brush.

HYPER-THIN PROFILE

Ultra thin working ends reach narrow interproximal spaces with ease. The flexible, versatile working ends allow for better visibility as compared to traditional composite instruments.

UNPARALLELED FLEXIBILITY

By incorporating Nickel Titanium, a material known for its super elasticity, Akro-Flex™ Composite Instrument acts as a solid brush. The resilient working ends are excellent when creating fine anatomical detail with delicate, artistic strokes.

ERGONOMIC HANDLE

The smooth, lightweight handle offers increased control due to the large diameter. It creates an ergonomically friendly option that provides maximum comfort and helps reduce hand fatigue. Reducing hand fatigue can increase the longevity of a clinician's career.

KOL CORNER

Instruments made in collaboration with **Dr. Gaetano Paolone and Dr. Salvatore Scolavino**, Opinion leaders Hu-Friedy.

CALIBRA™ COMPOSITE INSTRUMENT HU-FRIEDY®

FOR CALIBRATED RESTORATIONS

Calibra™ instrument is an **XTS (AlTiN)^{††}** coated composite instrument which helps to provide the proper anatomical curvature to the dentin material layer of a restoration and leaves the ideal space for the final layer of enamel material. The **Calibra™ “IN”** point is used to define the dentinal skeleton, while the **Calibra™ “OUT”** point helps to reduce the chances of excess composite material being placed during the final layer of the restoration. Calibra Composite Instrument acts as a **guide**, helping to prevent over-contouring at the preparation margin while assisting in reducing excess composite thickness build up as well as **modeling** the final layer of composite material.

HOW
CALIBRA™ IN
POINT WORKS

HOW
CALIBRA™ OUT
POINT WORKS

Calibra™ Composite Instrument consists of two terminals: “IN” which defines the dentinal skeleton. “OUT” which allows to verify the thickness and shape of the last layer without excess. This instrument is a caliper to check the thickness (a practical alternative to the sagittal silicone index) and a modelling tool for the last layer.

[†] WeRestore.it is not owned by or affiliated with Hu-Friedy. ^{††} Data on file, available upon request.

THE ESSENTIAL RESTORATIVE KIT INCLUDING "PLUG&SCULPT" INSTRUMENT

The Hu-Friedy 3SSENTIAL KIT by Werestore.it is the most straightforward kit of restorative ever made, with just 3 essential instruments at once: Anterior, Posterior and Spatula, from the Hu-Friedy Black Line Collection. The three instruments are synergic and interchangeable and the word "Essential" refers to the easiness of all restorative procedures focused on the essential steps to create high esthetic composite restorations while using this kit.

The revolutionary concept of "Plug&Sculpt" of the Posterior is very simple: one tip is used to plug the composite into the cavity and the other one can sculpt composite in additive and subtractive modelling techniques. The Anterior, instead, is called by the doctors "solid brush" since it models and spreads the composite very easily, just like a brush.

DID YOU KNOW? All hinged instruments – forceps, rongeurs, scissors, pliers, hemostats, orthodontic pliers, etc. – should be kept lubricated. Regular use of proper lubricants, like HU-FRIEDY® Instrument Lubricant Spray (ILS), will prevent rust, corrosion and stiff joints to ensure smooth operation. **All hinged instruments should be sterilised in the open position.**
